FairWind AS - Environmental policy

Introduction and aim

FairWind AS is a state-of-the-art quality concept within the wind turbine installation industry. There has been a steep rise in international demand for wind turbines in recent years - and thus their installation. And industry growth is increasing continually. FairWind offers an experienced approach to the challenges and organizational logistics of the professional installation of wind turbines. Our extensive full-service installation concept includes local recruitment and site-by-site logistics management, supported by quality service and high precision. We recognize that our operations result in emission to air and water and the generation of waste. It is our aim to comply with legislation and other requirements, continue to reduce the environmental impacts of our business and operate in an environmentally responsible manner. This policy describes how we will achieve our aim.

Responsibility

This environmental policy applies to all of our operations including management, office administration and service technicians. Our safety administrator is responsible for ensuring that the policy is implemented. However, all employees have a responsibility in their area to ensure that the aims and objectives of the policy are met.

Resources

We will ensure that resources are available to enable us to achieve our objectives and targets.

Objectives

As a company we have an impact on the environment:

On site

- Chemicals
- Waste
- Noise
- CO2 emission
- Water

We aim to:

- ✓ reduce the generation of noise by using generators, Manitou only when it is absolutely necessary
- ✓ reduce the emission of CO2 by using more ecological cars
- ✓ improve monitoring of waste handling
- ✓ improve segregation of waste
- ✓ implement chemical register and procedures for supply and handling chemicals on site

Office

- Energy
- Waste
- Water

We aim to:

- ✓ reduce the generation of energy by replacement normal light bulbs for energy-efficient
- ✓ improve segregation of waste
- ✓ reduce water consumption
- ✓ increase usage of recycled and environmentally certified products

Business travels

- CO2 emission
- Waste
- Energy
- Noise

We aim to:

- ✓ reduce the emission of CO2 by using more ecological cars
- ✓ use video or teleconferences to decrease business travels if it's possible

Targets

To achieve our aims we have set ourselves to following targets:

- Inform all customers and suppliers about our environmental policy
- Optimize utilization of resources
- Purchase more products locally, to reduce the environmental impact related to shipping, where practical
- Suitable training and information for staff in order to promote and foster sensitivity and awareness that will lead to the development of environmental best practices in the performance of their work
